

## Ultra-Torr Vacuum Fittings

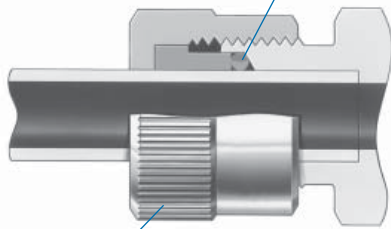

- Stainless steel construction, fluorocarbon FKM O-ring
- Reliable, repeatable sealing performance
- Available in tube sizes from 1/16 to 1 1/2 in.

## Features

Seal performance is maintained through repeated disconnects.

O-ring seals to glass, metal, or plastic tubing.

Knurled nut for easy, finger-tight assembly.

## Materials of Construction

- Body, nut, and sleeve: stainless steel
- O-ring: 70 durometer fluorocarbon FKM, wetted with a thin film of silicone vacuum grease.

## Temperature Rating

Standard fluorocarbon FKM O-ring, -25 to 400°F (-31 to 204°C)

## Testing

The ultra-torr fitting design has been helium leak tested to a maximum leak rate of  $4 \times 10^{-9}$  std cm<sup>3</sup>/s at ambient temperature. The leak rate increases as temperature increases due to permeation through the O-ring.

## Cleaning and Packaging

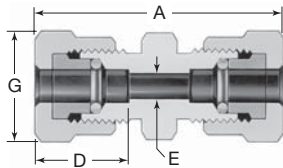

Swagelok ultra-torr vacuum fittings are cleaned to remove machine oil, grease, and loose particles. For more information, see *Swagelok Standard Cleaning and Packaging (SC-10)*, MS-06-62.

## Ordering Information and Dimensions

- Dimensions are for reference only and are subject to change.
- The E dimension refers to the smallest nominal inside diameter of the part.
- To order straight fittings bored through, add **-BT** to the ordering number.

Example: SS-1-UT-6-BT

### Union

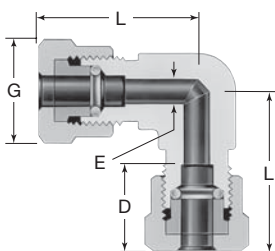

Tube OD in.	Ordering Number	Dimensions, in. (mm)			
		A	D	E	G

<sup>①</sup> Not a uniform O-ring size.

#### Safe Product Selection

When selecting a product, the total system design must be considered to ensure safe, trouble-free performance. Function, material compatibility, adequate ratings, proper installation, operation, and maintenance are the responsibilities of the system designer and user.

**Caution: Do not mix or interchange parts with those of other manufacturers.**
